HTML
– BACKEND DEVELOPMENT
Express
Node.js
- DATABASES
MySQL
MongoDB

💼 Experience

Personal Projects

Vacation Tagging System | Typescript | React | Node.js | MySQL

▪ Full Stack System | Aug 2023 - Present

▪ Backend Development: Developed a role-based main menu system that ensures secure access control.
This system adapts dynamically to user roles and maintains data integrity during vacation editing.
It includes validation, image handling, and price constraints.

▪ Frontend Design: Created a user-friendly React interface that prioritizes data integrity through intricate vacation editing validation.
This design enhances user interactions.

💼 Experience

Cryptocurrency Tracker | JavaScript | JQuery | Bootstrap | CSS | HTML
Frontend Single Page Application (SPA) | Jun 2023 – Aug 2023

▪ Enabled real-time data retrieval for numerous virtual coins in the cryptocurrency market through AJAX.
▪ Developed interactive live reports using Canvas.js for dynamic data visualization.
▪ Enhanced user experience with responsive Bootstrap components.

Gaming Store Manager & Web Designer

▪ Implemented effective marketing campaigns, boosting web sales by 20% in six months.

▪ Led a 6-member team, ensuring top-notch customer service and efficient store operations.
Enhanced the company website for a 30% increase in user-friendliness.

▪ Reduced procurement costs by 15% through vendor collaboration and contract negotiations.

🎓 Education
